COEP Technological University | +91 77670 15698 | aditiapore@gmail.com | Amateur Radio License VU39AP

PROFESSIONAL SUMMARY

Third-year Electronics & Telecommunication Engineering student (Minor in AI & ML) at COEP Technological University, with hands-on experience designing AI-powered assistive devices, analog signal-processing systems, and wireless communication projects. Strong technical communicator, skilled at explaining complex concepts to technical and non-technical audiences alike, developed through leadership as Secretary of the COEP Amateur Radio Club and community outreach roles. Confident presenting technical work, building relationships with external organizations, and collaborating across teams — seeking a Sales Internship at Texas Instruments to combine technical curiosity with customer-focused communication.

EDUCATION

B.Tech, Electronics & Telecommunication Engineering — Minor in AI & ML | COEP Technological University, 2024–2028

- JEE Mains — 96.98 percentile | MHT-CET — 99.65 percentile

EXPERIENCE

Database Intern — Softwin Infotech | SQL & MySQL | 6 Weeks, concluded July 2026

- Analyzed and troubleshooted real-world business databases, applying structured query writing and analytical thinking to identify and resolve data issues.
- Communicated findings and solutions clearly with the team, strengthening technical communication, attention to detail, and business awareness.

LEADERSHIP & ACTIVITIES

Technical Secretary — COEP Amateur Radio Club (VU2COE) | June 2026–Present

- Coordinate club events end-to-end and represent the club in interactions with external organizations, building professional relationships with stakeholders.
- Lead community outreach initiatives, communicating technical radio concepts clearly to audiences with varying levels of technical background.

Volunteer — COEP Amateur Radio Club (VU2COE) | 2024–2026

- Supported club operations and outreach programs, engaging directly with participants and the public before taking on the Secretary role.

NGO Volunteer — Azad Nayakawadi Foundation, Kolhapur

- Engaged with community members to support foundation initiatives, developing interpersonal and relationship-building skills through direct outreach.

Volunteer — Mindspark 2024, COEP Technological University

- Assisted with event coordination and participant interaction, contributing to smooth execution and a positive attendee experience.

TECHNICAL PROJECTS

AI Vision Assistant for Visually Impaired | ESP32-CAM · Groq LLaMA API · Google TTS · I2S

- Designed an ESP32-CAM device that captures a user's surroundings and converts scene descriptions into real-time speech, aimed at improving everyday accessibility for visually impaired users.
- Integrated the Groq LLaMA API and Google TTS, plus Base64 encoding, REST API calls, an OLED status display, and low-light flash support, translating a complex AI pipeline into a simple, accessible product.

Seven-Stage Analog EMG Signal Processing Circuit | TL071 Op-Amps · Analog Front-End · EMG

- Designed a seven-stage analog front-end for surface EMG signals to support prosthetic motor control, combining amplification, filtering, and signal-conditioning stages for a clean, usable output — a practical, structured analytical solution to a real assistive-technology need.

KHN State-Variable Audio Filter | Op-Amp Based · Active Filter · ANC

- Designed a flexible active filter with independent frequency and Q control, offering a low-cost analog alternative to digital signal processing for ANC applications.

Accelerometer-Based Air Mouse Using Microcontroller | ESP32 · MPU6050 · Bluetooth HID

- Built a motion-controlled input device translating hand movement into cursor control via BLE HID, reflecting a practical, user-centered approach to product design.

SKILLS

- Programming:** Python, C, SQL
- Embedded Systems & Electronics:** ESP32, ESP32-CAM, Op-Amps, Signal Conditioning, OLED, I2S Amplifiers
- Communication Protocols:** I2C, I2S, UART, Bluetooth
- Software & Databases:** SQL, MySQL, Groq LLaMA API, Google TTS
- Professional Skills:** Technical Communication, Presentation Skills, Stakeholder Management, Cross-Functional Collaboration, Relationship Building, Community Outreach, Event Coordination, Project Ownership, Team Leadership, Analytical Thinking, Problem Solving, Data Analysis, Customer-Focused Mindset, Adaptability, Fast Learner, Initiative
